

Tianle (Tyler) Wu

North York, ON | (437) 987-5626 | tianle.wu@georgebrown.ca | [Portfolio](#)

PROFESSIONAL SUMMARY

Mobile and full-stack developer with a strong foundation in building user-facing applications across iOS, Android, and cross-platform environments. I bring a unique blend of software development, UI/UX design, product thinking, and media production background, allowing me to approach projects from both technical and user-experience perspectives. Experienced in independently turning product ideas into structured user flows, functional applications, and polished interfaces, while collaborating effectively in Agile/Scrum team settings. Comfortable working across mobile and web projects, aligning design decisions with technical implementation, and using AI-assisted development tools to improve planning, debugging, and delivery efficiency without sacrificing code quality.

TECHNICAL SKILLS

Programming: JavaScript, TypeScript, Swift, SwiftUI, Kotlin, HTML5, CSS3

Mobile & Frontend: React Native, Expo, iOS Development, Android Development, Responsive Web Development

Backend & Data: Node.js, REST APIs, Firebase, Firestore, MongoDB, Room Persistence Library

APIs & Integrations: OpenAI API, fal.ai, Stripe, MapKit, Core Location, Google Maps API

Architecture & Concepts: OOP, MVC, MVVM, Agile, Scrum, Role-Based Flows, Reusable Components

Design & Product: Figma, UI/UX Design, Wireframing, Prototyping, Apple Human Interface Guidelines, Material Design 3, Design-to-Code Workflows

Tools & Platforms: Git, GitHub, VS Code, Cursor, Claude Code, Codex, Google Stitch, Xcode, Android Studio

PROJECTS

Mirra – AI Beauty Web App | Sole Developer

2026 | [ask-mirra.vercel.app](#)

- Built and deployed an AI-powered beauty web app from concept to production, taking full ownership of product decisions, architecture, UI/UX, backend setup, AI integration, payment flow, and deployment
- Integrated OpenAI API and fal.ai to support AI-driven beauty previews and image-generation workflows; implemented Firebase Authentication, Cloud Firestore, Firebase Storage, and Stripe Checkout for paid preview credits
- Used an agentic development workflow with Cursor, Claude Code, OpenAI Codex, ChatGPT, and Google Stitch to plan features, debug issues, refactor code, and accelerate product iteration

BookaPro – Freelancer Marketplace App | React Native / Expo, Firebase

Team Project, 2026

- Led a 3-person team building a full-stack mobile marketplace for customers and freelancers, owning system architecture, Firestore data modeling, PRD planning, and reusable UI component structure
- Initialized Firebase infrastructure including Authentication, Cloud Firestore, and Storage; defined collection schemas to support user roles, freelancer profiles, services, appointments, reviews, and notifications
- Architected map-based freelancer discovery with location services, category filtering, freelancer portfolio views, and booking workflows; led GitHub setup, merge coordination, and MVP delivery planning

EasyRent – iOS Rental Marketplace | SwiftUI, Swift, Firebase

Academic Project, 2026

- Built a SwiftUI iOS rental marketplace backed by Firebase Authentication and Cloud Firestore, using an MVVM-inspired structure with dedicated helpers for authentication, database, and location operations
- Implemented role-based flows for Landlord, Tenant, and Guest users, including conditional navigation, guest browsing, property management, shortlist functionality, and rental request workflows
- Designed Firestore collections for users, properties, and rental requests; integrated MapKit and Core Location for property geocoding, detail maps, and location-based browsing

CarShare – Android Car Rental App | Kotlin, Firebase

Academic Project, 2025

- Built a role-based Android car rental app using Kotlin and Cloud Firestore, with separate Owner and Renter dashboards, dynamic routing, and Google Maps API integration
- Implemented CRUD workflows for vehicle listings, booking creation, confirmation codes, and cancellation updates synced across user dashboards; applied OOP and modular architecture to separate UI and business logic

EDUCATION

Mobile Application Development and Strategy | George Brown, Toronto

Sept 2025 – Aug 2026

Ontario College Graduate Certificate (GPA 4.0)

- iOS development with Swift & SwiftUI — UI layout, navigation, MVVM architecture, async/await, Firebase integration
- Android development with Kotlin — RecyclerView, Google Maps API, Firebase integration
- Full-stack & Cross-platform — Node.js, MongoDB, Firebase, React Native; System Architecture Design and Figma prototyping

Notable Accomplishments: *Dean's Honour List (2026) | Excellence Student Award (2026)*

Journalism | University of Southern California, Los Angeles, USA

Graduated: Dec 2018

CERTIFICATIONS

- Scrum Fundamentals Certified (SFC) – ScrumStudy | May 22, 2026
- Google AI Essentials | Oct 30, 2024
- Google UX Design Certification | Aug 28, 2023

PROFESSIONAL EXPERIENCE

Frontend Developer (Freelance) | Flash Entertainment, Toronto

Jan 2026

- Built a responsive landing page using HTML5, CSS3, and Vanilla JavaScript with a custom 1440px-to-mobile adaptive grid (CSS Grid & Flexbox) and glassmorphism UI effects aligned to the client's film production brand identity

UX Designer & Marketing Consultant | Chinese New Star Media Inc., North York

Sept 2022 – Mar 2025

- Proposed UI improvement recommendations for the Superlife web platform and mobile app, identifying inconsistencies in typography, layout, spacing, and responsive behavior
- Collaborated closely with the developer team to translate design recommendations into practical implementations, clarifying interaction logic and technical feasibility throughout development

Media Coordinator | Xinflix Media, Markham, ON

Mar 2022 – June 2022

- Mentored incoming colleagues and interns on video editing workflows; established a standardized editing process and shared asset library that improved production efficiency across a 5-person content team; produced and edited short-form video for Xiaohongshu and WeChat Official Account, achieving 1,000+ likes and hundreds of shares on a single post
- Collaborated closely with stage directors, cinematographers, and on-site crew to coordinate live production of 2 YouTube-streamed stage performances, ensuring smooth cross-functional communication under tight broadcast timelines

UI/UX Designer & Editor | Fula Company LTD., Los Angeles, CA

Oct 2020 – Jan 2021

- Conducted 10–20 user surveys and interviews to define needs and preferences; designed complete user flow for the 'Let's Game' Web and App within a 3-month product cycle
- Created app wireframes and website MVP; collaborated with developers on requirements specs and feature modules

VOLUNTEER EXPERIENCE

UI/UX Design Lead | Snowball Digital LTD., Toronto, ON

Mar 2024 – Aug 2024

- Led design strategy and 0-to-1 execution for Snowball's product, defining core features including content recommendation, feed ranking, and search/sort; worked closely with engineers to align design decisions with iOS UIKit standards and technical constraints
- Conducted competitive analysis and user interviews to identify pain points with existing solutions; delivered research insights that directly shaped the product roadmap
