

Tianle (Tyler) Wu

North York, ON | (437) 987-5626 | tianle.wu@georgebrown.ca | [Portfolio](#)

PROFESSIONAL SUMMARY

Full-stack developer with a background in mobile development, UI/UX design, and product thinking. Experienced in building user-facing digital products from idea to implementation, with a strong focus on usability, problem-solving, and end-to-end ownership. Comfortable working across web, mobile, and AI-powered product environments, and collaborating in fast-moving Agile teams.

TECHNICAL SKILLS

Programming: TypeScript, JavaScript, Swift, Kotlin, HTML5, CSS3

Full-Stack & Frontend: React, Next.js, React Native, Node.js, Responsive Web Development, Reusable Component Architecture

AI & Integrations: Generative AI, LLM Applications, OpenAI API, fal.ai, Prompt Engineering, REST APIs, Stripe

Backend & Data: Firebase, Firestore, MongoDB, Firebase Authentication, Firebase Storage

UX & Product: UI/UX Design, Figma, Design Systems, Wireframing, Prototyping, User Flows, Design-to-Code Workflows

Architecture & Development: OOP, MVC, MVVM, Role-Based Workflows, Agile, Scrum

Tools & Platforms: Git, GitHub, Jira, VS Code, Cursor, Claude Code, OpenAI Codex, ChatGPT, Google Stitch

PROJECTS

Ask Mirra – AI Beauty Web App | Sole Developer

2026 | ask-mirra.vercel.app

Next.js, TypeScript, Firebase, OpenAI API, fal.ai, Stripe

- Built and deployed a user-facing AI web application from concept to production, owning product strategy, architecture, UI/UX, backend integration, payments, and deployment
- Integrated OpenAI API and fal.ai into an end-to-end AI workflow, designing user flows that translate AI capabilities into a simple and accessible product experience
- Implemented Firebase Authentication, Firestore, Storage, and Stripe Checkout, integrating multiple external services across the application while maintaining clear user states and workflows
- Debugged a production Stripe webhook issue involving signature verification and request-body handling, restoring the payment-to-preview workflow and validating the integration end to end

BookaPro – Freelancer Marketplace App | Team Lead & Developer

2026 | bookapro-app.git

React Native, TypeScript, Firebase

- Led a three-person team building a multi-role marketplace application, contributing to system architecture, product requirements, Firestore data modeling, and reusable component design
- Designed end-to-end customer and freelancer workflows across discovery, profiles, services, booking, rescheduling, cancellation, and role-based navigation, balancing technical implementation with usability and product consistency
- Built reusable UI patterns and shared components to support consistent experiences across customer and freelancer interfaces while reducing duplicated implementation.
- Coordinated GitHub workflows, feature integration, debugging, and MVP delivery in an Agile development environment

Novi – Digital Product & Web Platform | Independent Developer

2026 | novitoronto.com

HTML5, CSS3, JavaScript, Cloudflare

- Built and launched Novi's responsive business website, translating service offerings into clear page structure, interaction flows, and frontend implementation.
- Designed the UI/UX and developed reusable responsive sections using HTML5, CSS3, JavaScript, CSS Grid, and Flexbox.
- Managed deployment, domain, DNS, and SSL-related setup for the live website.

EasyRent – iOS Rental Marketplace | SwiftUI, Swift, Firebase

Academic Project, 2026

- Built a role-based iOS marketplace with authentication, Firestore data workflows, MapKit/Core Location, and distinct Landlord, Tenant, and Guest user experiences. Designed Firestore collections for users, properties, and rental requests; integrated MapKit and Core Location for property geocoding, detail maps, and location-based browsing

CarShare – Android Car Rental App | Kotlin, Firebase

Academic Project, 2025

- Built a role-based Android marketplace with Firestore, Google Maps, CRUD workflows, booking management, and modular separation of UI and business logic.

EDUCATION

Mobile Application Development and Strategy | George Brown Polytechnic, Toronto

Sept 2025 – Aug 2026

Ontario College Graduate Certificate (GPA 4.0)

- Relevant Coursework: iOS development with Swift/SwiftUI, Android development with Kotlin, full-stack and cross-platform development with Node.js, MongoDB, Firebase, React Native, system architecture design, and Figma prototyping.
- **Notable Accomplishments:** *Dean's Honour List (2025, 2026) | Excellence Student Award (2026)*

CERTIFICATIONS

- Scrum Fundamentals Certified (SFC) – ScrumStudy | May 22, 2026
- Google AI Essentials | Oct 30, 2024
- Google UX Design Certification | Aug 28, 2023

PROFESSIONAL EXPERIENCE

Full-Stack Developer & Product Engineer | Novi (Independent) |

April 2026

- Independently manage product planning, UI/UX, development, deployment, and ongoing iteration for Novi's digital products and web presence.
- Make end-to-end product and technical decisions across frontend implementation, backend integrations, user flows, web operations, and business requirements.
- Prioritize features, troubleshoot technical issues, and drive delivery from idea to launch while balancing usability, maintainability, and business goals.

Frontend Developer (Freelance) | Flash Entertainment, Toronto

Jan 2026

- Built a responsive landing page using HTML5, CSS3, and Vanilla JavaScript with a custom 1440px-to-mobile adaptive grid (CSS Grid & Flexbox) and glassmorphism UI effects aligned to the client's film production brand identity

UX Designer & Marketing Consultant | Chinese New Star Media Inc., North York

Sept 2022 – Mar 2025

- Proposed UI improvement recommendations for the Superlife web platform and mobile app, identifying inconsistencies in typography, layout, spacing, and responsive behavior
- Collaborated closely with the developer team to translate design recommendations into practical implementations, clarifying interaction logic and technical feasibility throughout development

UI/UX Designer & Editor | Fula Company LTD., Los Angeles, CA

Oct 2020 – Jan 2021

- Conducted 10–20 user surveys and interviews to define needs and preferences; designed complete user flow for the 'Let's Game' Web and App within a 3-month product cycle
- Created app wireframes and website MVP; collaborated with developers on requirements specs and feature modules

VOLUNTEER EXPERIENCE

UI/UX Design Lead | Snowball Digital LTD., Toronto, ON

Mar 2024 – Aug 2024

- Led 0-to-1 product design for recommendation, feed ranking, and search features, working closely with engineers to align user experience decisions with technical constraints
- Conducted competitive analysis and user interviews to identify pain points and translate findings into product requirements and roadmap decisions
